

# Mobile Technology Center

IP Communications Showcase

Tadiran Telecom, Inc. Mobile Advance Technology Centers (MATC) are outfitted with Tadiran's state of the art telecommunications products. Tadiran provides high performance solutions that support the business applications needed to meet current and future needs of enterprises. The MATCs, 40 foot demonstrations on wheels, let you test drive Tadiran solutions first hand.

**Telephony over IP** - hardware and software that enables people / businesses to use the Internet as the transmission medium for telephone calls by sending voice data in packets using IP rather than by traditional circuit transmissions of the PSTN.

**FlexiCall, Freedom & Wireless Applications** - Features that enable your employees to be reached through one number, making it easy for them to receive important calls and timely messages. Whether an

employee is traveling on business or has just stepped away from the desk, we can seamlessly bridge calls received by the communications platform to their remote cellular, wireless or IP phone — ringing their desk and remote phones simultaneously.

**Composit Contact Center** - Next-Generation Contact Center Solution

**Coral IPx Office** - The "All in a Box" Office in the WAN solution. Integrated Router, Firewall, VPN and NAT support Single Board Architecture.

**Red Sea IP softswitch** - a robust and scalable pure IP Communication system that delivers full-feature functionality for heterogeneous media environment of voice, video, messaging, fax, chat, text messages, URL and HTML pages, and data.

**Unified Messaging** - features that make it easier for your employees to access the information that they need to keep your business running smoothly. With Unified Messaging voice messages, email and faxes are consolidated into a convenient Windows browser-based platform to provide your employees with instant access to their messages anytime, anywhere.

**Voice over Internet Protocol** - Coral VoIP solutions allow companies to take advantage of the bottom-line benefits of converged networks – lower communications costs, increased productivity, improved customer satisfaction – and do it at their own pace. Whether you have offices in one location or a hundred, Coral VoIP solutions allow you to build on existing network investments so you can evolve to a converged network cost effectively over time.

*A World of Communication for Everyday Business*

For over thirty-five years Tadiran has been connecting people all over the world
